

04OAGQD - Vibration mechanics (prof. Fasana)
Scaled Bridge
06.06.2024

This report should contain at least:

- 1) A figure showing the positions of the accelerometers
- 2) A figure showing the sum of the auto-PSD of all channels to check all the modal shapes
- 3) A figure showing the stabilization diagram of one channel to implement the complex exponential method
- 4) A table including estimates of natural frequencies and damping ratios of the first three flexural modes of the structure
- 5) A figure showing at least the first identified mode shape identification of the modes for each natural frequency

The pdf file should contain max 3 pages.
